# Docker : Docker MasterClass for DevOps

Upload Your Docker Image to  
Cloud/Docker Registry

# Docker : Service Containers

- User must have the Account on [hub.docker.com](https://hub.docker.com)
- Docker Cloud uses Docker Hub as its native registry for storing both public and private repositories. Once you push your images to Docker Hub, they are available in Docker Cloud.
- Command to login:  
***docker login***
- Push Image on Docker Hub:  
***docker image push USER/Image-name***

# Thank You...

Don't be the Same! Be Better!!!
