

Red Hat Ansible : The Next Level

Connect Nodes with Ansible Engine

Ansible Automation

- Provide clients IP/FQDN in Inventory of Ansible.
- Sample Test to verify Configuration-
 - `ansible all -m ping`
- Check Python availability on AWS Nodes.
- Verify passwordless access from Ansible Engine to Ansible Clients.
- Add Hosts in inventory file and test ansible connection.

Thank You...

Don't be the Same! Be Better!!!
