

Red Hat Ansible : The Next Level

Manage File/Directory on Clients

Ansible Automation

- User can create Files or directories on Ansible Clients from Ansible Controller.
- Syntax -
`ansible [group] -m file -a "dest=file/dir destination location state=<State>"`
- Create file-
`ansible [group] -m file -a "dest=file destination location state=touch"`
- Delete file-
`ansible [group] -m file -a "dest=file destination location state=absent"`

Ansible Automation

- Create file with specific permission-
`ansible [group] -m file -a "dest=file destination location state=touch mode='permissions'"`
- Create directory-
`ansible [group] -m file -a "dest=directory destination location state=directory"`

Thank You...

Don't be the Same! Be Better!!!
